Projects

Real Estate Web App– https://real-state-project-1.netlify.app/

This is a Real Estate Web Application built using React.js. It allows users to explore property listings with a modern and responsive design.
- Property listing cards with images and details.
- Search and filter functionality for properties.
- Responsive UI that works on desktop, tablet, and mobile.
- Navigation between pages using React Router.

Student Result Analysis System -

• A Python-based tool that analyzes student marks from a CSV file to generate key insights like average, highest, and lowest scores
• Calculates pass/fail statistics, identifies top performers, and visualizes the top 10 scores in a bar char.
• Built using Python with Pandas for data analysis and Matplotlib for data visualization

Virtual Platform–https://virtual-main-pp.netlify.app/

This is a Virtual Platform web application built using React.js. It provides an interactive and modern user interface where users can explore different sections virtually.
- Virtual navigation across multiple sections/pages.
- Interactive UI with smooth transitions and animations.
- Responsive design for desktop, tablet, and mobile.
- Routing handled with React Router.

Education

BCA (Information Technology) – Madhyanchal Professional University, Bhopal (2022 – 2025)

MCA (Information Technology) – IES University, Bhopal (2025 – 2027)

Certificates

Responsive Web Development – Infosys (07/2024)

MERN Stack Developer – Coding Thinker Training Institute, Bhopal

Strengths

Fast Learner & Self-Motivated

Problem Solving & Analytical Thinking

Good Communication Skills

Languages

Hindi, English

Achievements

Solved 300+ coding problems on LeetCode
